

**More than 10,000 visitors! The world of real Sci-Fi where
you can actually “visit” and “take a picture”
From June 2nd to 25th**

BACON CO. LTD., will hold “Exhibition of Factory Night View where you can actually visit 2017”, a photo exposition of breathtakingly beautiful factory night view with concept where you can actually “visit”, which will bring you a new art experience, from Friday June 2nd to Sunday June 25th at TODAYS GALLERY STUDIO in Asakusabashi, Tokyo.

“Exhibition of Factory Night View where you can actually visit” in 2015 and 2016 had more than 10,000 visitors* in total.

*Including “Exhibition of Changing ruin VS factory night view where you can actually visit”

What is “Factory Night View where you can actually visit”?

—Factory Night View is shifting from “watching” to “visiting”—

Since the factory boom of few years ago, factories have become a popular sightseeing spot. Especially the night view is extremely beautiful so that it overwhelms those who see with its undecorated natural beauty. This exhibition is the joint photo exhibition of such “Factory Night View”. It’s characteristic is that it only gathers factories where you can “actually visit”. Since we wish you to experience the beauty of Factory Night View not only with photo but with your own eyes, we will put access information together with photos.

Highlight of “Factory Night View where you can actually visit 2017”

—There are special trick so that you can “actually visit” even more in the latest photo!?

The characteristic of this exhibition is that you can see the photo and then actually visit the place. You can watch the factory in the same angle as the photo and take your own picture and this point is the point very popular in this exhibition.

In this exhibition, in order to do more tricks based on participants’ perspectives, we plan to exhibit phone camera photo of each creators. It will make you feel that you can “take” Factory Night View regardless of the spec or setting of the camera and it will make you even more eager to “visit” the place. This time, there will of course

be explanation and access information for each photo. After watching, you can visit the place and enjoy comparing photo and the real factory.

There are 13 photographers scheduled to be exhibited including professional photographers such as Hiroshi Ookura and Eiichi Katayama who direct the photobook "Factory Night View" and also those who are popular on the Internet such as Tamu Takejo(@tam.takejo) and Masashi Yamazaki (masa.105) etc. Exhibited photos including unpublished new photos should be more than 250.

Also, as an on-site limited goods, we plan to sell official guidebook with all photographers and access map to factories (limited to 300). There will be a gift of original Factory Night View post card to the first 2,000 visitors.

<Special Exhibition>

In Special booth, there will be special exhibition. In front of special space with black wall like night, the photo of Hiroshi Ookura will be exhibited in circular shape. You can enjoy glittering night view in front of you.

<Guidebook/Goods>

Newly designed limited guidebook where you can actually "visit", sorry if it's sold out!

We will sell newly designed official guidebook. There will only be 300 and at the last exhibition, it was sold out immediately. It covers exhibiting artists and also includes access code to shooting point.
