DOVER PASTEURISER 77, with its alcoholic degree of 77%, has a strong sterilizing power. Its superior ingredients effectively prevent many kinds of mold. As a genuine product produced by a distillery, it boasts purity that is most reliable and excels in maintaining food sanitation.

77% alc. is just the best degree for food hygiene.

For Sterilization and Food Preservation

Pasteuriser 77.
ドーバー パストリーゼ77

DOVER PASTEURISER 77 shows excellent performance in mold prevention and sterilization of perishable food, confectionery and fruits such as strawberries. Moreover, for daily use it is effective in sterilization of kitchen tools, tableware, cooking machinery, and the like. Its strength lies in the fact that it may be sprayed directly on any kind of [foodstuff], making it ultimately essential for sanitation of all kinds of food.
