

SloIron

21st Century Iron

(Plant-Based Ferritin-Iron)

SloIron is the first supplement to deliver the iron complex found in legumes.

Plant-Based Ferritin-Iron

Introducing **SloIron** — a new, all-natural solution to the old problems of iron deficiency and sensitivity to iron!

The efficient absorption and controlled release of **SloIron** inside the body can avoid the irritation of other iron supplements.

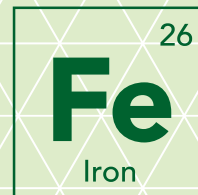

SloIron is a natural, hydrated, ferric oxide biomineral ($\text{Fe}_2\text{O}_3\text{H}_2\text{O}$), inside a protein cage that serves as a natural enteric coating.

The water-soluble, protein-iron complex of **SloIron** is absorbed by a unique, natural mechanism—different from heme-iron or iron chelates and salts.

The natural composition of the **SloIron** biomineral together with its protein capsule ensure slow iron transport through the gut to the blood, minimizing harmful side effects and delivering iron exactly where it is needed for maximum effect in the body.

MADE IN U.S.A

SloIron is:

Natural/Plant-Sourced
Vegan

Organic

Gluten-Free

Non-GMO

Non-Heme

Anti-Oxidant

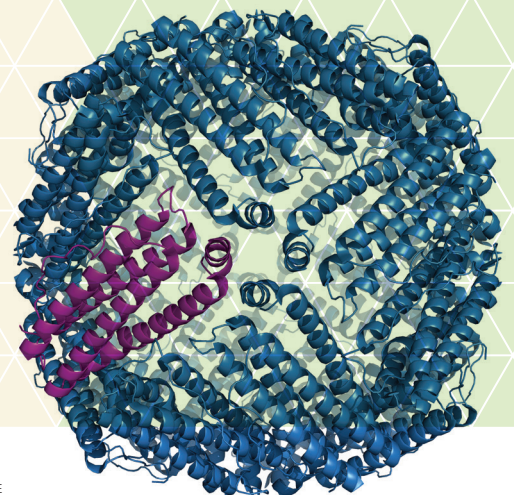

Naturally Enteric-Coated

Heat-Stable

Anti-Inflammatory

Non-Irritating

Safe and Effective
