駅の時計としては世界最大の札幌駅南口外壁の「星の大時計」を腕時計として開発しました。

札幌駅南口外壁の『星の大時計』は直径7.2メートル。駅の時計としては世界最大です。満天の星空のような大時計は、北海道と星の図形との歴史的な深い関係を念頭にデザイン。北の玄関のシンボルとして親しまれています。

今回、この大時計のデザインを普段からお楽しみいただけるよう、腕時計として開発しました。薄く堅牢でシンプルなステンレスとサファイアガラスのケースに、日常防水、上品な革バンドまたは夏でも快適にお使いいただけるメッシュバンドによる仕上げとなっております。

The large built-in clock exposed on the high wall at South exit of JR Sapporo Station in Hokkaido, is well known as the world's largest station clock. It moves with a huge dial of 7.2 metric diameter, featuring a starlit blue sky.

The starry dial design is inspired by the geographical feature of Hokkaido, which looks like a shining star in the sky.

This built-in clock is loved by the local people as a symbol of a gateway to their homeland, located at the northern end of the Japanese archipelago.

The "Sapporo Star Watch" is designed with the same concept, applying the starry dial to its surface for everyone's enjoyable daily wearing.

Quartz movement is encased in simple hard stainless steel and it is topped with sapphire glass. Waterproof under daily use.

Elegant leather band or meshed metal band is available to match the watch head. The meshed belt will comfortably fit especially during the summer season.
