Quantum Solutions Co., Ltd.

Dear Shareholders,

**Exploring the possibility of developing Artificial Intelligence Generated Content (AIGC)**

Quantum Solutions Co., Ltd. is pleased to announce that we are now exploring the possibility of developing Artificial Intelligence Generated Content (AIGC) business. Going forward, we will focus on the development and implementation of AI and New Energy Automobile related technology on various businesses, and eventually become the leader in these fields.

Our business goal begins with our intention to develop a AIGC product which is in form of a website domain for users to generate their intended content based on Artificial Intelligence technology. If this new AIGC product can be launched to market, it will primarily serve the users in Japan, where we believe a significant demand for innovative AI solutions.

In the long-term, we aim to apply the AIGC technology to automobiles where it can improve road safety and efficiency. By analyzing data from sensors, cameras, and other sources, it can automatically provide real-time guidance to drivers on identifying certain issues, such as, car park location, traffic congestion, road closure and optimal routes. In addition, AIGC technology can assist drivers in both human and vehicle fatigue detection and offer predictive maintenance solutions, helping drivers to avoid accidents and breakdowns.

We also intend to develop an AIGC product that can address limitations of the current peer products available in the market today, especially when it comes to capturing real-time information from the internet and analyzing data from multiple sources. To address these limitations, we hope our AIGC product can incorporate advanced web scraping techniques and data extraction algorithms, enabling it to collect and analyze real-time data from a variety of sources.

We believe that our AIGC product, once materialized, shall have significant potential to revolutionize the way businesses operate in Japan and beyond, and we are committed to bringing this innovative solution to market as soon as possible. We look forward to updating you on our progress as we continue to explore with the artificial technology team the possibility to develop our own AIGC product.

-End-

**【Quantum Solutions Co., Ltd. Company Information】**

Company Name : Quantum Solutions Co., Ltd. (Tokyo Stock Exchange code 2338)  
Address : 1-10-9 Kudankita, Chiyoda-ku, Tokyo, Japan  
Representative : Shao Yun, Representative Director and President  
Capital : 2,995 million yen  
Business : Application development and distribution  
Software development
